ENTERPRISE NETWORK SOLUTIONS

We offer Complete Enterprise Network Solutions that simplifies and optimizes user data and traffic
Networking is the heartbeat of every business, especially when it is fast, secure and reliable be it wireless, wired (routing and switching) or the combination of both. What challenges are you currently facing with your network infrastructure?

Are you looking at building a network from scratch? Let our network engineers examine and analyze your current environment and propose a network that will eliminate inefficiencies, performance gaps, insecurity and redundancy.

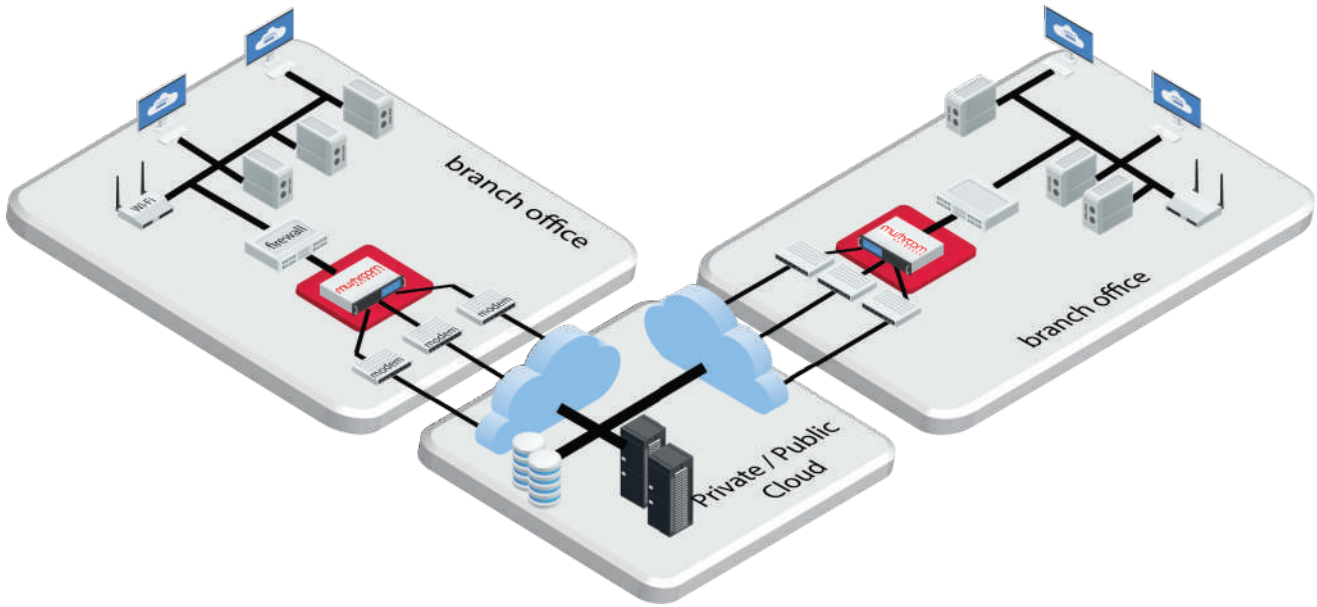
Let our networking solutions empower your business; our networking team have the technical knowhow to build a network infrastructure that will deliver the best networking experience for your business by keeping your information secure through a combination of the best firewall, switches and router from the best Original Equipment Manufacturer (OEM).

Our solutions which cut across Cisco and Force10 networks integrate your branch or regional offices, data centers and headquarters or campus locations. Which will provide to?
-Improved productivity through fast and reliable network connectivity.
-Improved user satisfaction by accelerating applications over the network.
-Reduced network expenses by simplifying operations.

SOFTWARE DEFINED WAN NETWORKS

Aggregate your bandwidth for better speed, reliability
Using a Single Service providers' connectivity is unpredictable by the nature of reliance on single path. Potential blackouts, brownouts caused by service provider issues, cross-traffic, or static QoS (Quality of Service) and priority management can cause loss or degradation of connectivity.

The multi-WAN nature of SD-WAN solution implements intelligent mechanisms to monitor and react in real-time to mitigate those type of networking problems.and cost. You can now bundle up to 8 different Service provider's connection in a single pipe and set your network on autopilot.



ENTERPRISE AND INFRASTRUCTURE SOLUTIONS

Technology hardware infrastructure provides the basic building block for technology development, integration and business process optimization. RIOSS Technology partners with hardware server and storage vendors to provide top of the range hardware sales and solutions from end to end to her clients.
